WORK EXPERIENCE

Amazon

Seattle, WA

Sr. Product Manager - Tech, Seller Partner Trust & Safety

Jan '25 - Present

- Launched GenAI-powered user(seller)-facing appeal experience for product authenticity policy violations, enabling users to reinstate their listings and reduce time to reinstate by 39%
- Developed LLM-powered case summary workflows, adding signals from multiple data sources, cutting investigator handling time by 35%, and improving decision quality by 10%. Projected opex savings of \$0.75M across 10 policy areas
- Built a proactive notification experience to help users complete KYC verification and avoid account suspension, improving de-risking success rate by 4.5% and preserving \$85M+ in Gross Merchandise Sales(GMS)
- Launched a human-in-the-loop review queue, reducing false positive enforcements against EU sellers for KYC policy by 10%, protecting annual GMS of \$125M since Q2'25 launch
- Increased coverage of a pre-enforcement remediation experience for listing enforcement from 56% to 87.5%, across 6 policy risk areas, and reduced high-value listing(>\$1000 GMS) enforcement volume by 15%
- Launched a surge protection feature to flag anomalies in enforcement volumes using Random Cut Forest(RCF) Machine Learning model, across all policy areas for selling partners at the account and listing grain
- Presented a strategy document to the VP leadership on enforcement governance, highlighting opportunity areas, and successfully secured funding for the 2026 roadmap

Cognex Corporation

Boston, MA

Product Manager - Analytics Platform

Jan '23 - Jan '25

- Led the launch of v1.0 of AI-powered vision system management software for the EV industry, with a forecasted market opportunity of \$3M for 3 years
- Designed wireframes in Figma for an Analytics and Image Browser feature, improving upon the existing design and reducing the time to resolution by 25% for the end-user
- Devised a roadmap to incorporate features to make the S/W platform compliant with 21CFR Part 11 FDA standard
- Developed a financial model to project subscription revenue from the current customer base and performed a cost-benefit analysis for customers to adopt subscription pricing
- Conducted research on pricing models of competing products to establish benchmark values, developed a "value-based" pricing model for B2B analytics and Edge Computing IIoT Platform
- Utilized SQL and Python to perform data analysis on 1000 support tickets, effectively identifying user pain points and uncovering gaps in the product

Searce Inc (Google Cloud Partner)

India

Product Manager

Aug '19 - Jul '21

- Led a cross-functional team of engineers and designers to design features for a low-code B2B supply chain planning and delivery application
- Implemented "Value vs Effort" prioritization framework, delivering 3 user-critical features within a 6-month timeline

Senior Product Consultant

Jul '18 - Jul '19

- Expanded consulting and sales practice for Google Maps Platform in the South India Region, achieving a 4x revenue growth to \$350K, surpassing the previous period of 2015-2017
- Developed and executed a go-to-market (GTM) sales strategy, targeting 5 crucial customer segments encompassing 2000 clients, resulting in an 8% closure rate and driving a revenue increase of \$100K in Q3 of FY 2019
- Conducted workshops and QBRs with customers for optimized Google Maps API implementation, delivering overall cost savings of \$400k+ on their cloud billing
